

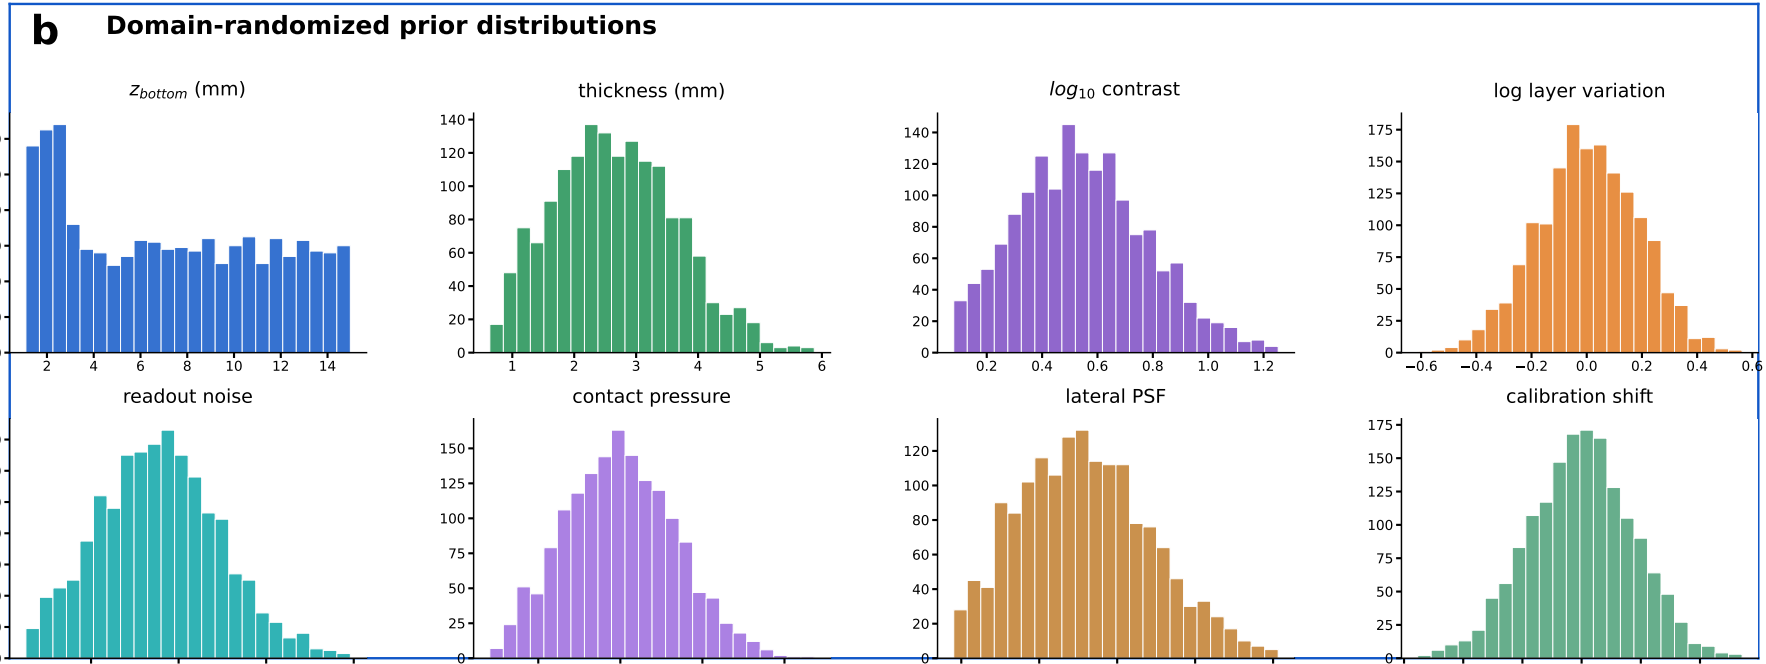

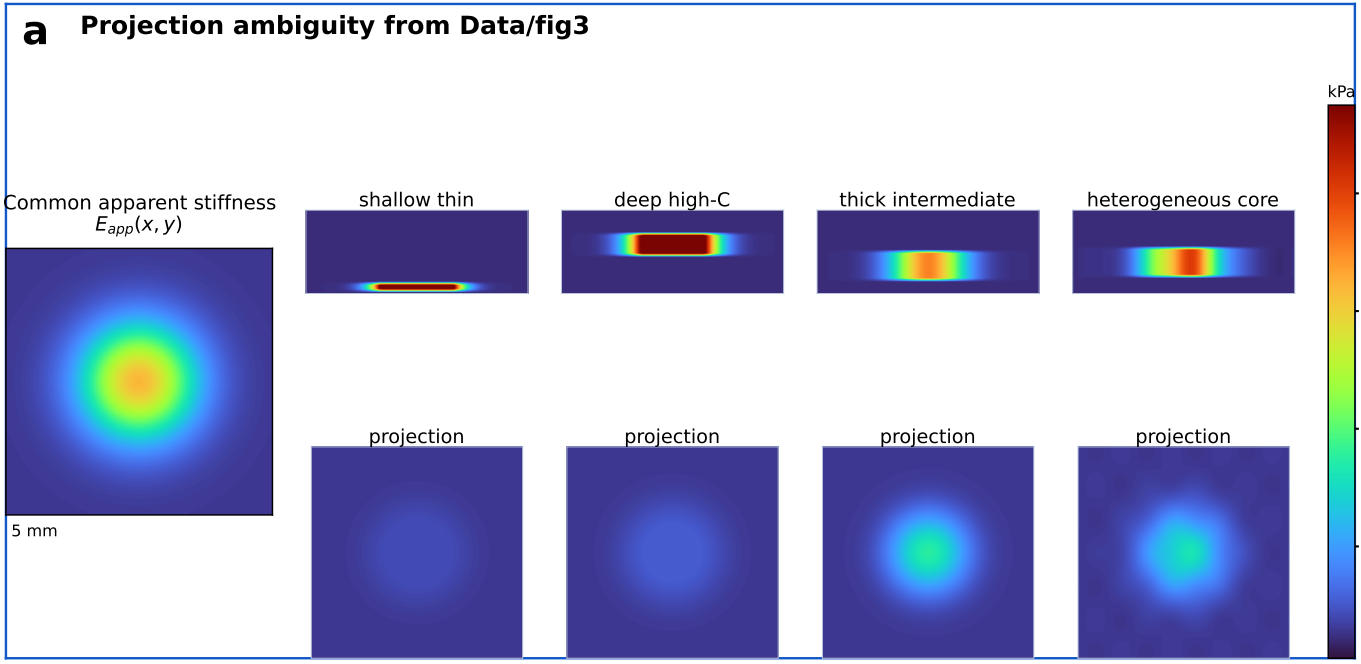

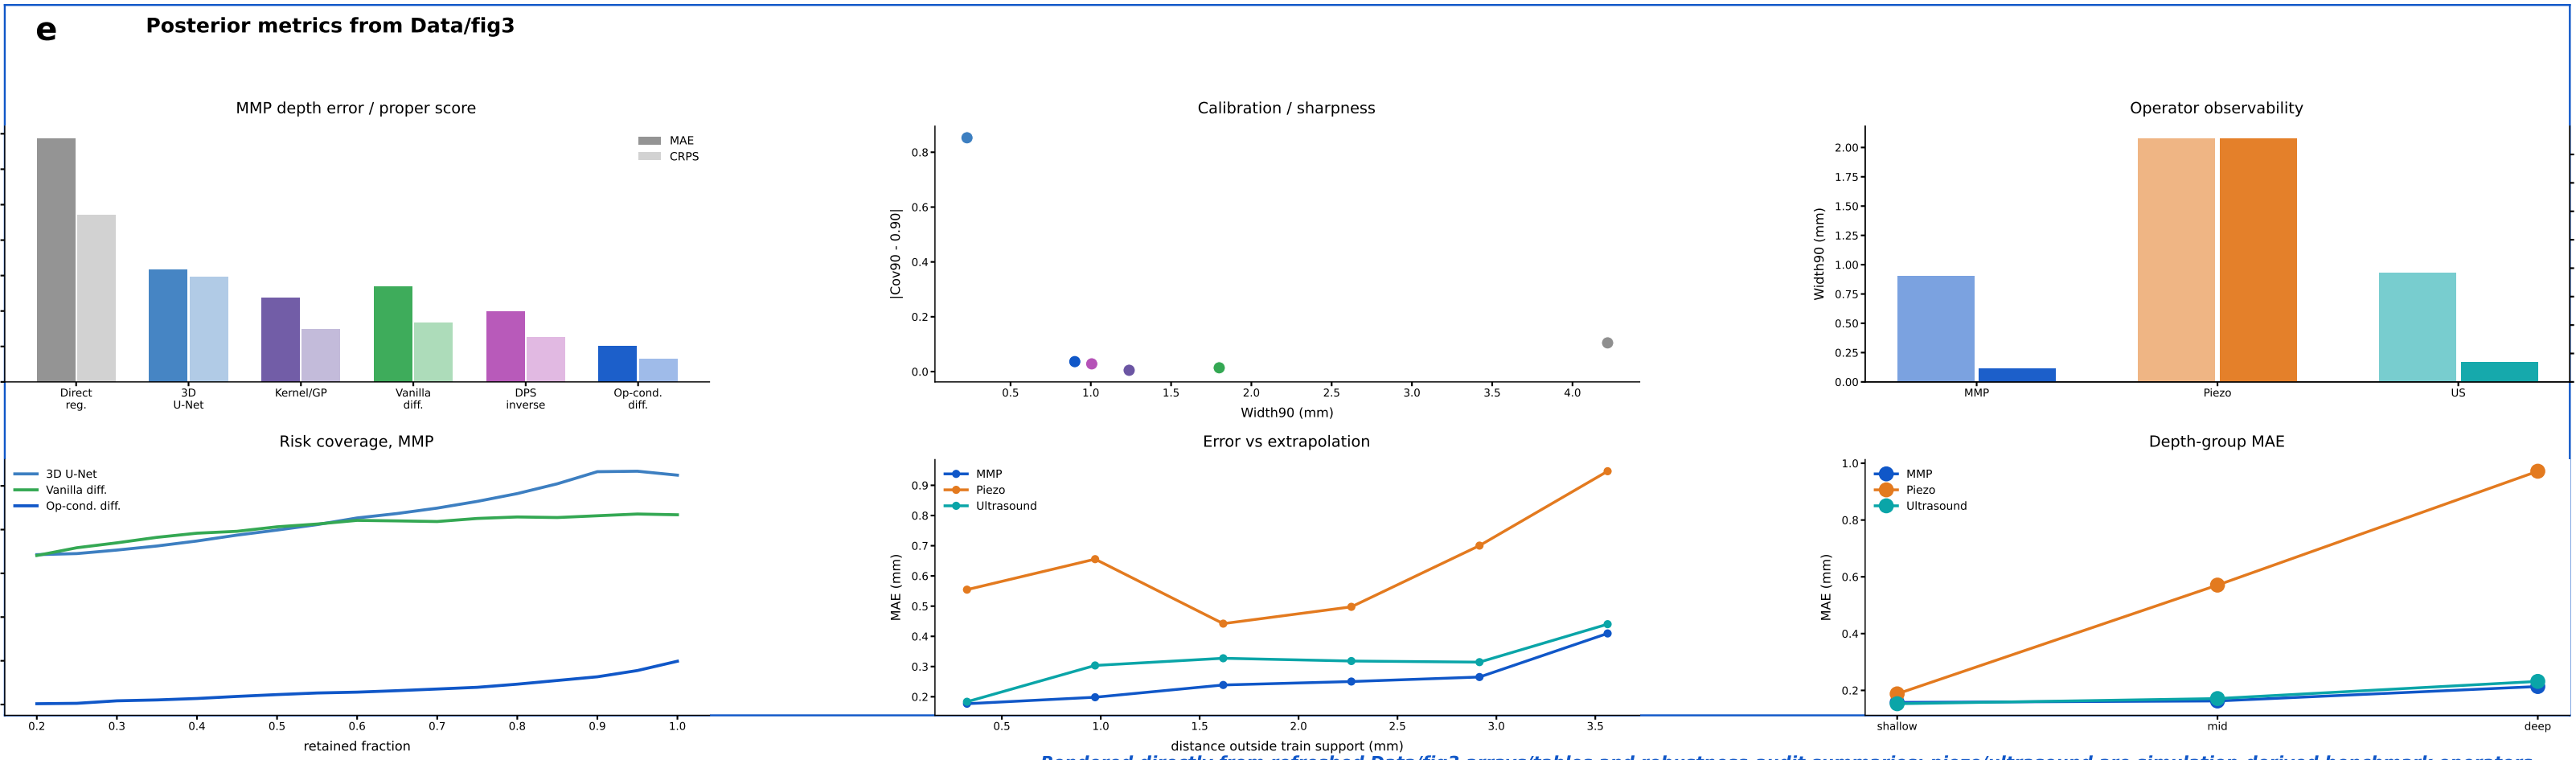

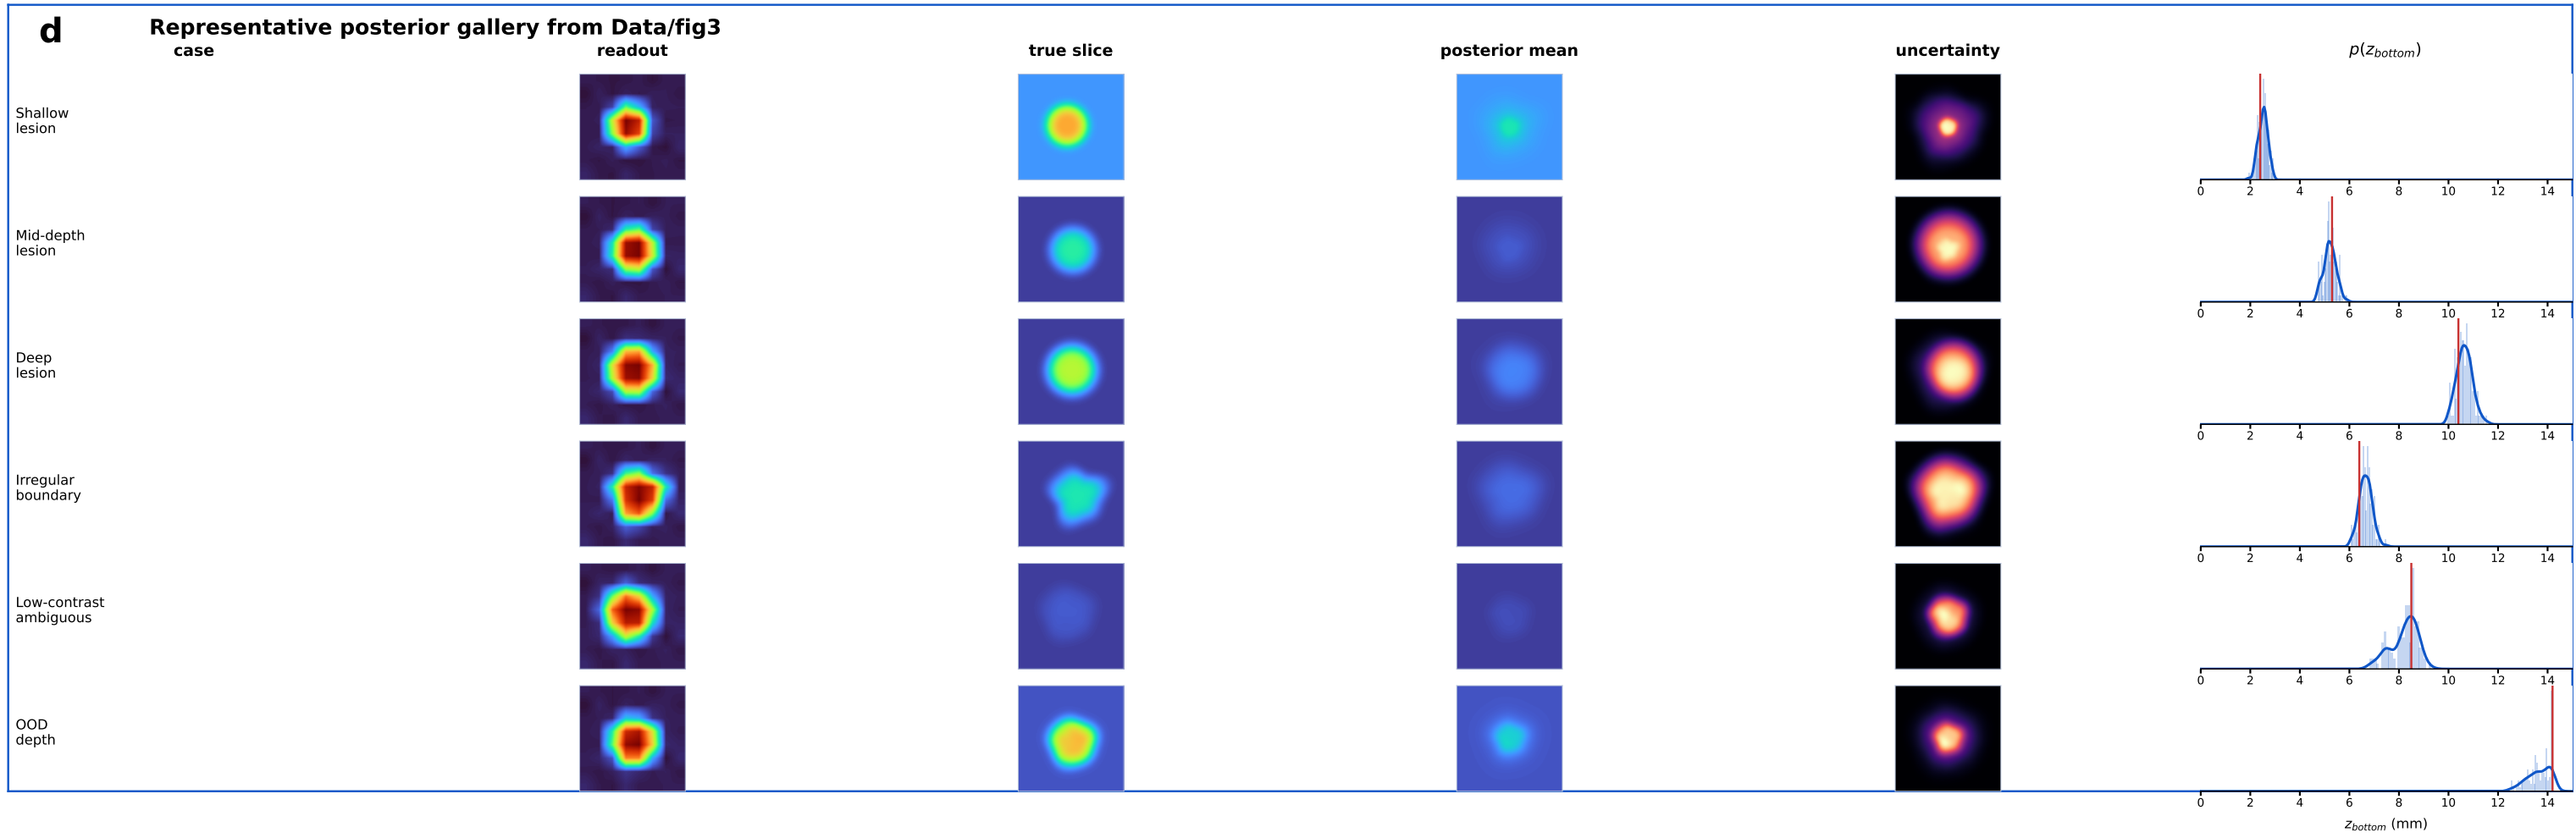

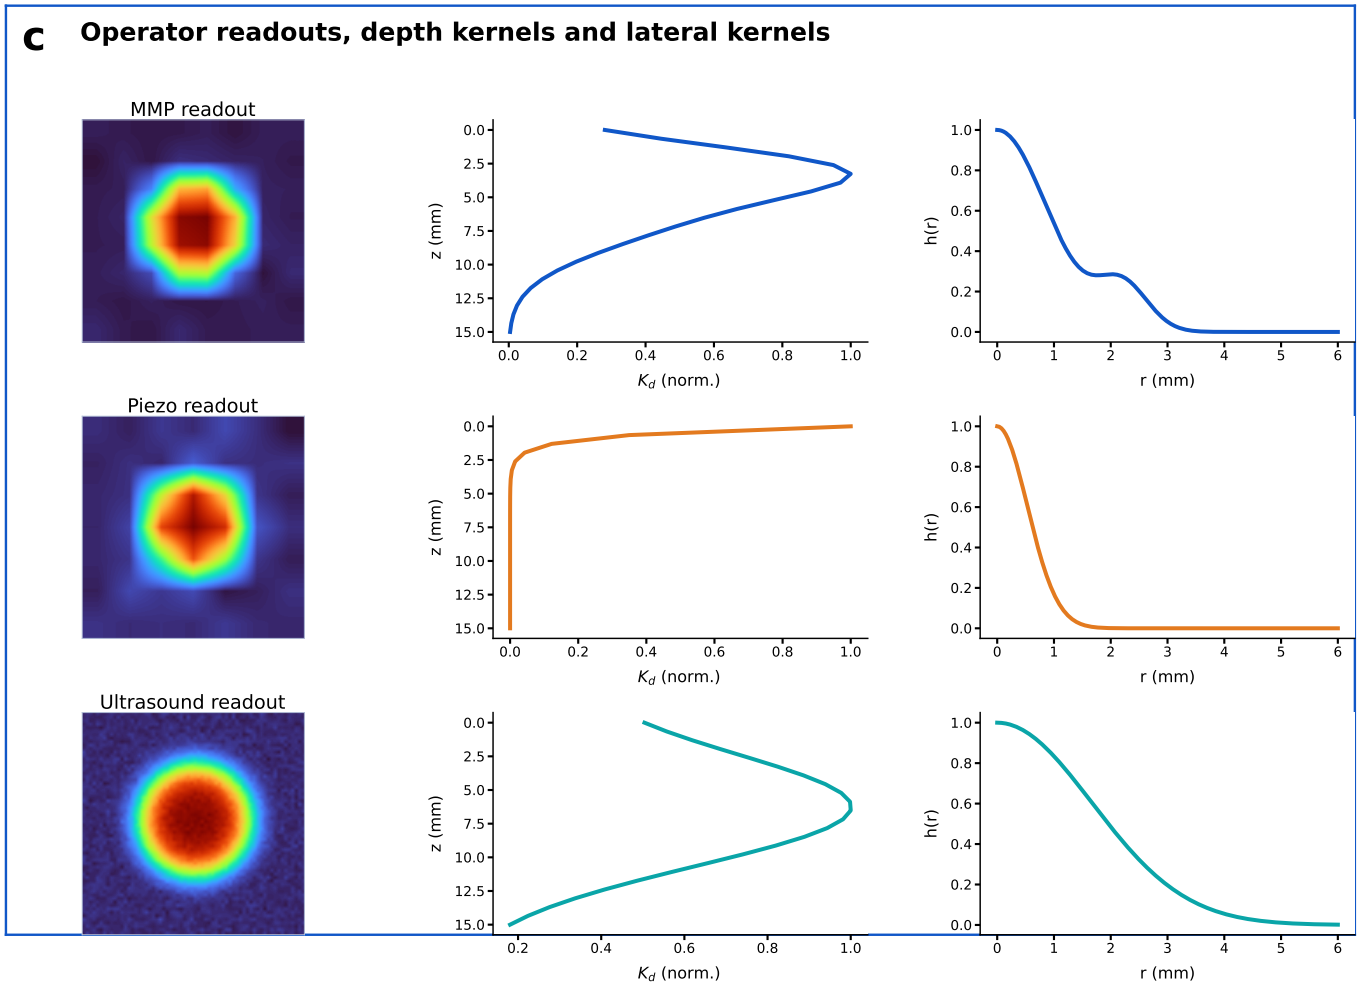

Figure 3 actual-data visualization | Data/fig3 only, no V3 AI data plots

**Data status and guardrail**

|                                     |                                     |         |
|-------------------------------------|-------------------------------------|---------|
| <input checked="" type="checkbox"/> | Generated Figure 3 data assets      | PASS    |
| <input checked="" type="checkbox"/> | Paired MMP/Piezo/US benchmark rows  | 150/150 |
| <input checked="" type="checkbox"/> | Method2B high-fidelity COMSOL queue | 512/512 |
| <input checked="" type="checkbox"/> | NCS robustness gate                 | PASS    |

This dashboard is data-only: no V3 template data plots are used. Piezo/US are simulation-derived benchmark operators.

**f Data sources rendered in this standalone file**

|                     |                                                                                           |
|---------------------|-------------------------------------------------------------------------------------------|
| <b>Panel a</b>      | Data/fig3/panel_a/eapp_common.npy; projections.npy; alternative_3d_states.npz             |
| <b>Panel b</b>      | Data/fig3/domain_randomization/parameter_table.csv                                        |
| <b>Panel c</b>      | Data/fig3/operators/*kernel.npz; lateral_psf.csv; operator_readouts_examples.npz          |
| <b>Panel d</b>      | Data/fig3/latent_truth; Data/fig3/posteriors/posterior_mean/uncertainty/zbottom_samples   |
| <b>Panel e</b>      | Data/fig3/metrics/depth_metrics.csv; calibration/risk/extrapolation/multimodality metrics |
| <b>Source label</b> | SIMULATED_BENCHMARK, with missing paired real hardware explicitly not synthesized         |

Rendered directly from refreshed Data/fig3 arrays/tables and robustness-audit summaries; piezo/ultrasound are simulation-derived benchmark operators.
