

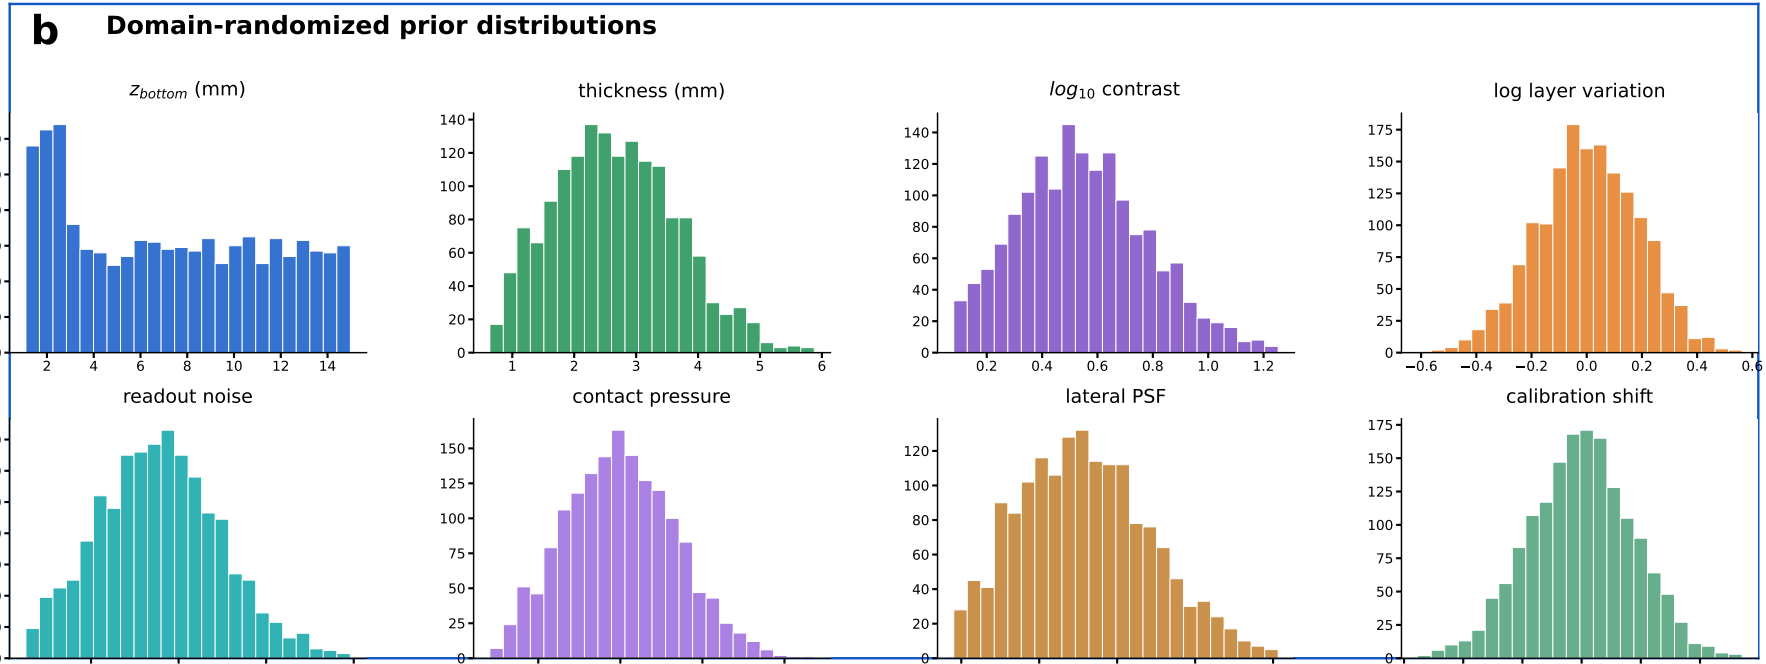

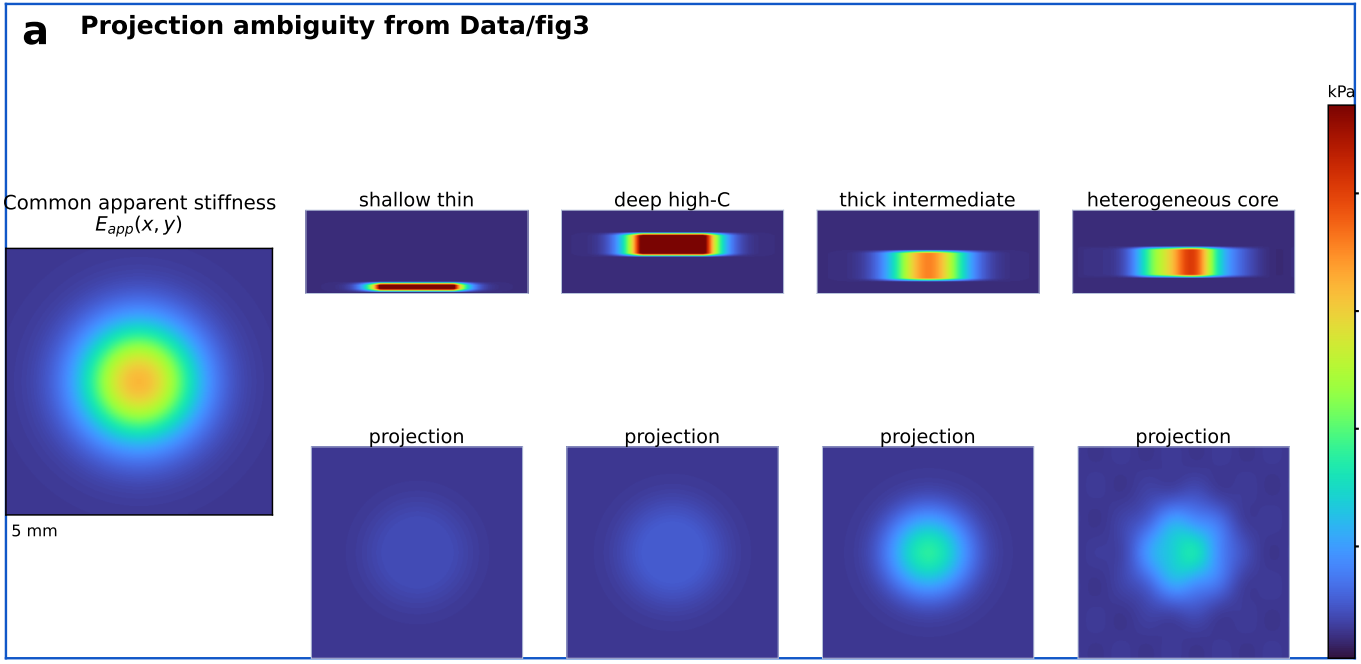

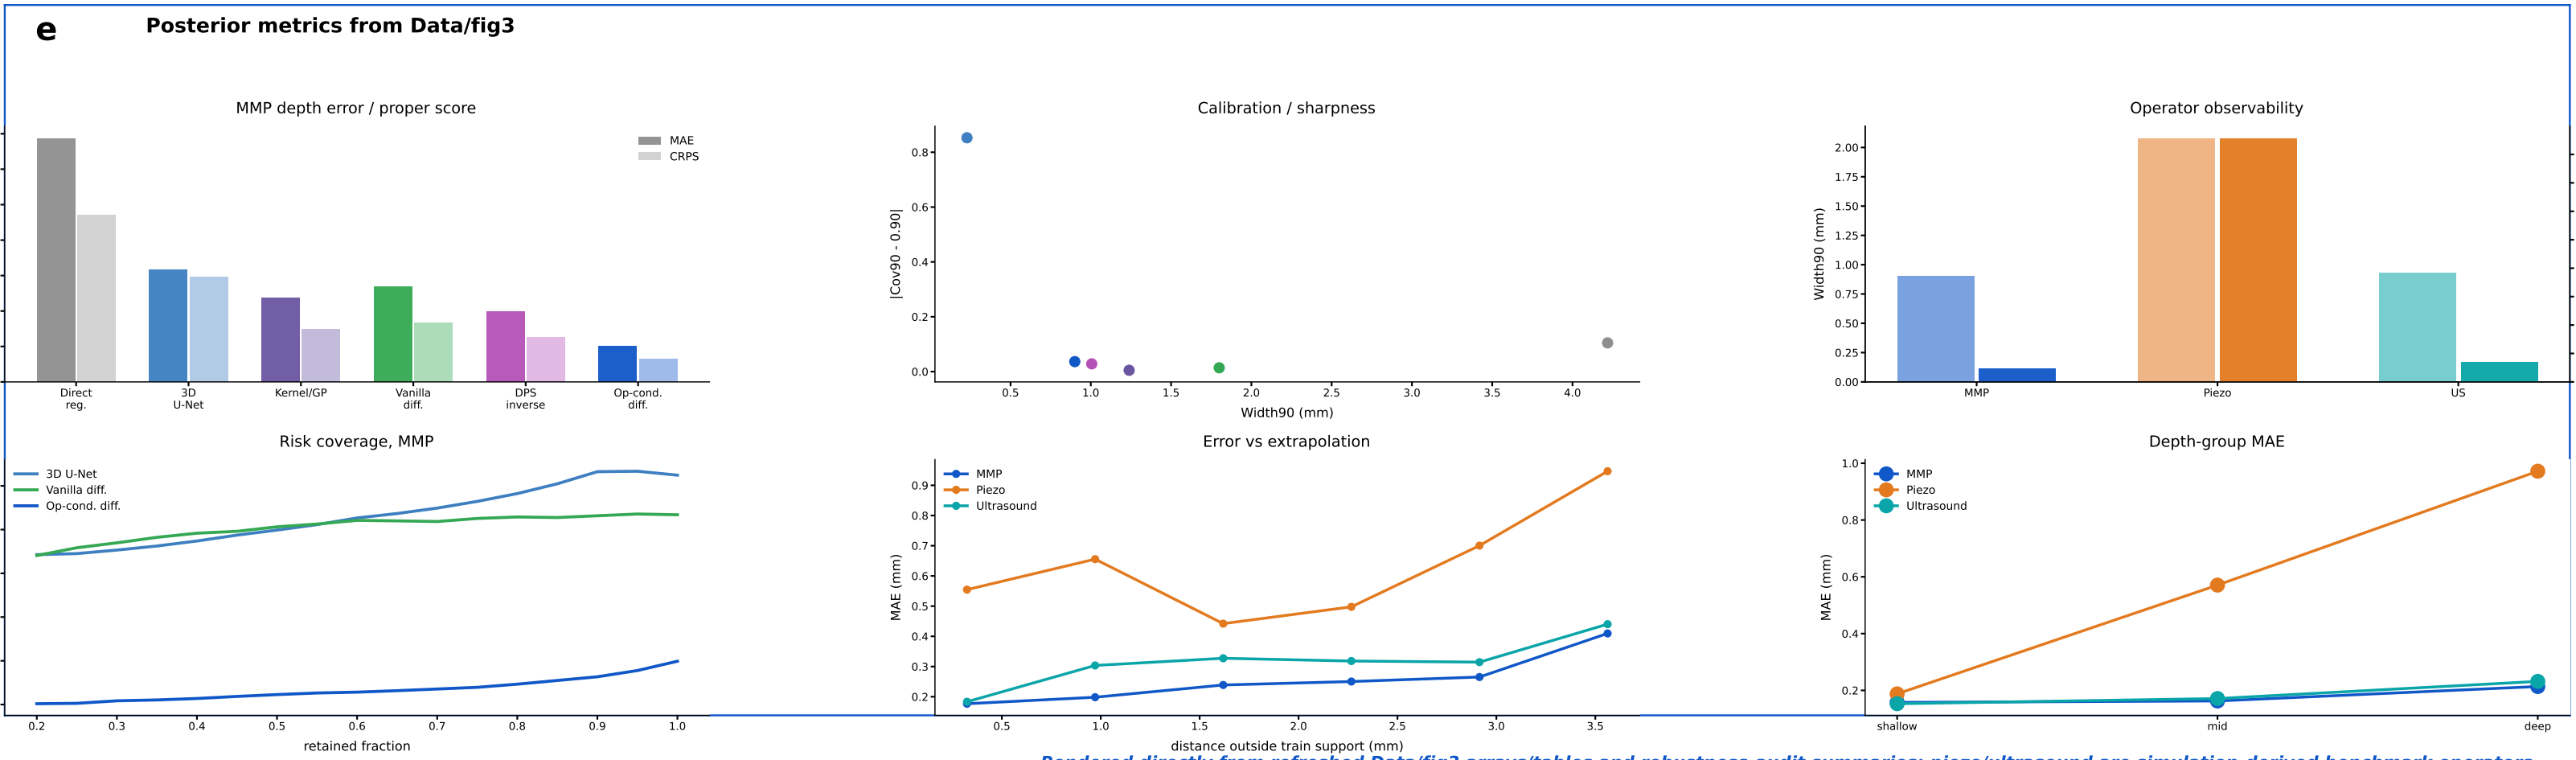

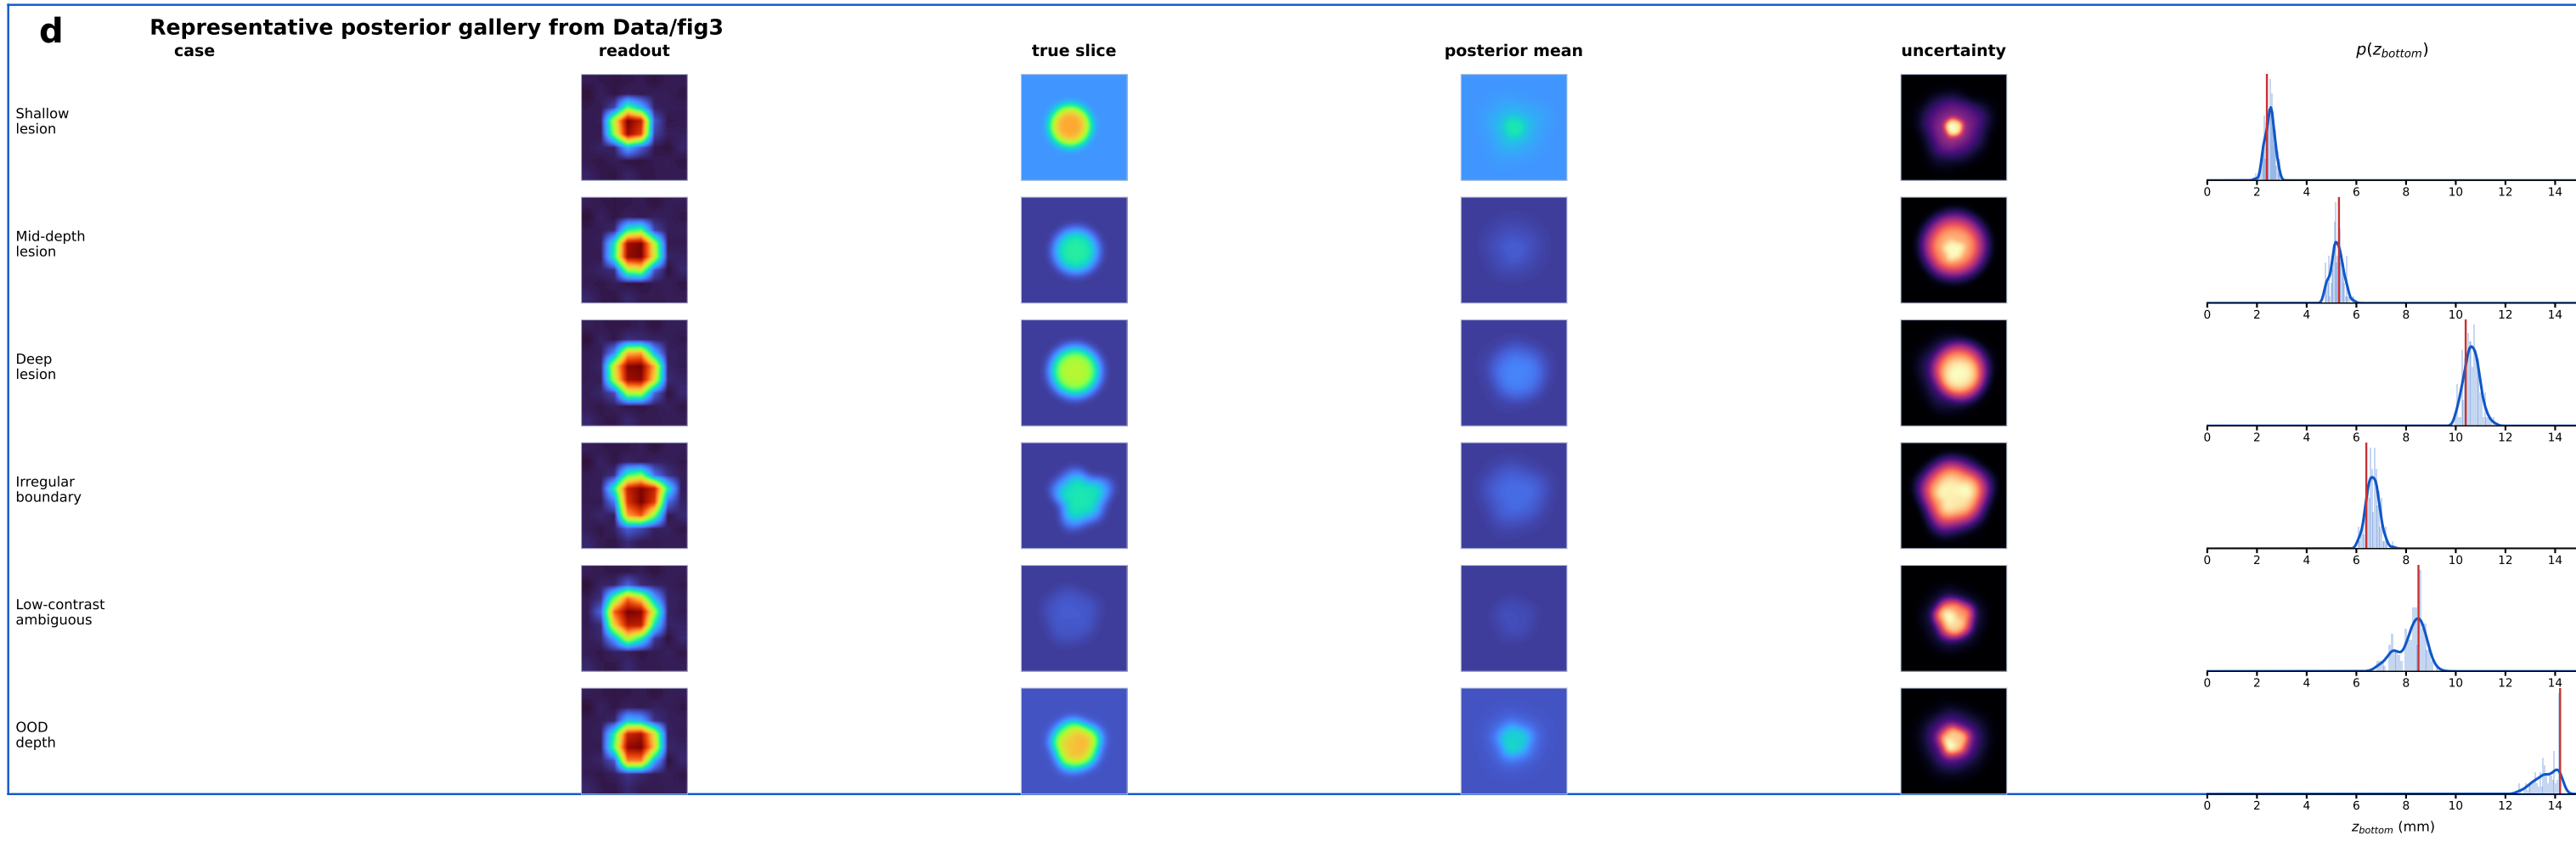

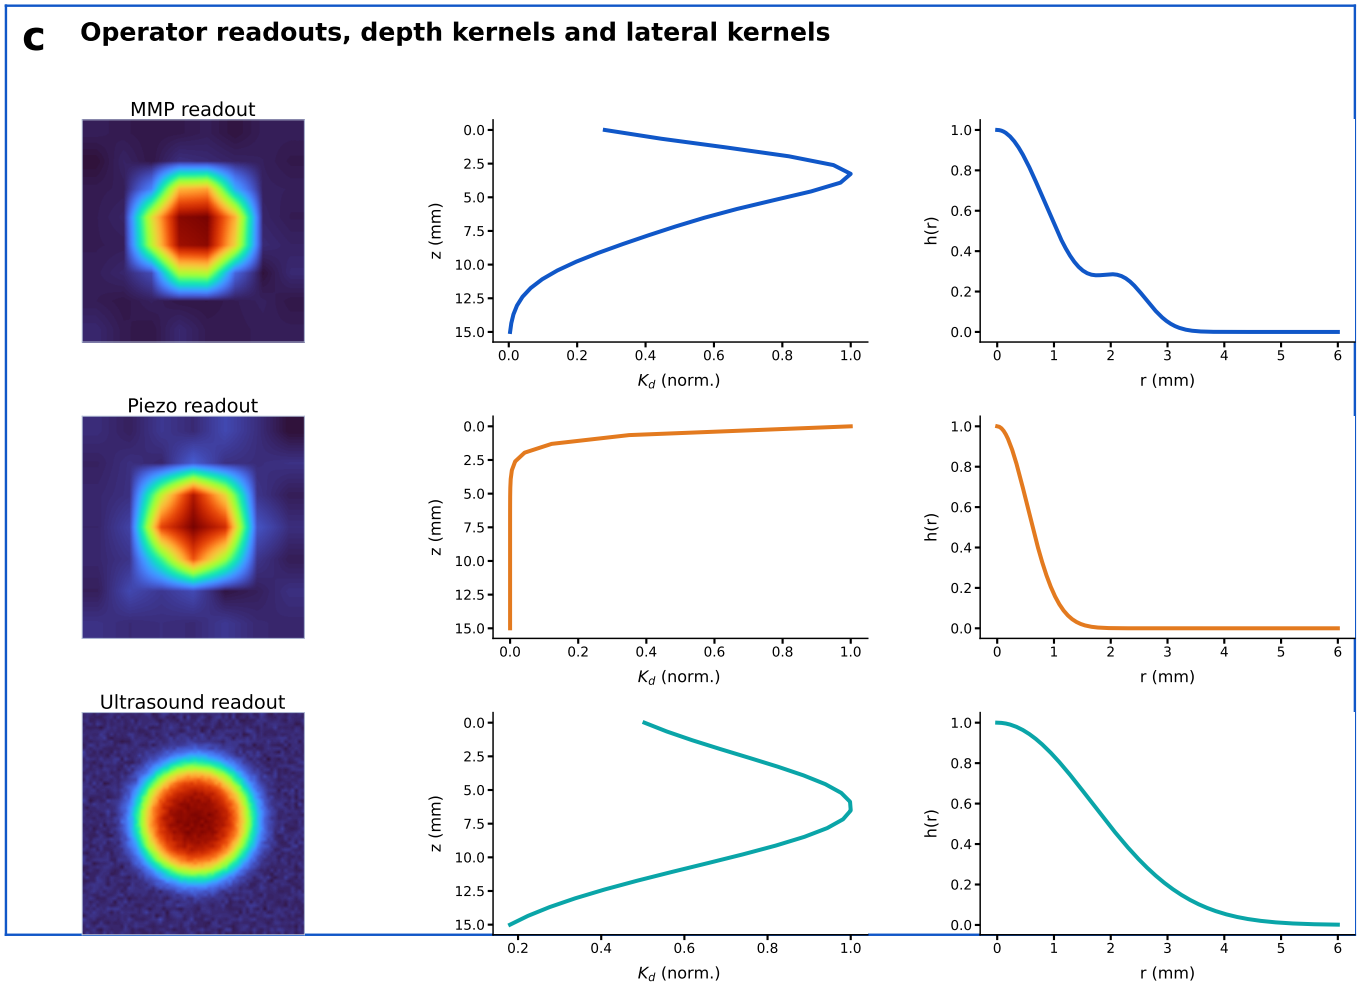

Figure 3 actual-data visualization | Data/fig3 only, no V3 AI data plots

Data status and guardrail

☒	Generated Figure 3 data assets	PASS
☒	Paired MMP/Piezo/US benchmark rows	150/150
☒	Method2B high-fidelity COMSOL queue	512/512
☒	NCS robustness gate	PASS

This dashboard is data-only; no V3 template data plots are used. Piezo/US are simulation-derived benchmark operators.

f Data sources rendered in this standalone file

Panel a	Data/fig3/panel_a/eapp_common.npy; projections.npy; alternative_3d_states.npz
Panel b	Data/fig3/domain_randomization/parameter_table.csv
Panel c	Data/fig3/operators/*kernel.npz; lateral_psf.csv; operator_readouts_examples.npz
Panel d	Data/fig3/latent_truth; Data/fig3/posteriors/posterior_mean/uncertainty/zbottom_samples
Panel e	Data/fig3/metrics/depth_metrics.csv; calibration/risk/extrapolation/multimodality metrics
Source label	SIMULATED_BENCHMARK, with missing paired real hardware explicitly not synthesized

Rendered directly from refreshed Data/fig3 arrays/tables and robustness-audit summaries; piezo/ultrasound are simulation-derived benchmark operators.
